

WPio 12

Lithium-Ion
Hand Pallet Truck
Capacity 1200 kg

Ideal for use in industrial applications

Ergonomic and safe tiller including Smart Display

Ideal for use in logistics and retail

The WPio12 – an innovative assistant

The WPio12 is an electric hand pallet truck with a lithium-ion battery. It is ideal for transporting all kinds of goods over short distances. In contrast to conventional hand pallet trucks, the WPio12 lifts and moves goods using electrical power. The minimal L2 dimension (length to face of forks) of only 390 mm, makes the WPio12 extremely compact and ideal for use in confined spaces, e.g. in stores and business centers of all types.

Fast charging + top-up charging

After deep discharge cycle, charging to 60% battery capacity takes only 40 minutes and the battery is charged to full capacity after 2.5 hours.

Thanks to the maintenance-free lithium-ion battery and the included charger daily routines stay much the same when a conventional hand pallet truck is replaced with the WPio12.
